EQUIPMENT INSPECTION

MACHINE	SERIAL NUMBER	INSPECTION GRADE
Injection Molder	SGMM-12345	PASS

INSPECTION SUMMARY
After conducting a comprehensive inspection of the injection molder, no issues or concerns were reported. The technician diligently assessed all the machine's components and operating systems, ensuring their proper functionality. Furthermore, the safety measures were thoroughly examined and determined to be fully operational and compliant with standards. As a precautionary measure, the technician recommended regular maintenance to maintain the machine's excellent condition for future production runs. In summary, the inspection affirmed that the machine was operating optimally, adhering to safety regulations, and ready for utilization.

Injection Unit	Good	✓
Mold Clamping Unit	Good	✓
Hydraulic System	Good	✓
Temperature Control System	Good	✓
Ejector System	Good	✓
Lubrication System	Good	✓
Safety Devices	Good	✓
Control Software	Good	✓
