EQUIPMENT INSPECTION

MACHINE	SERIAL NUMBER	INSPECTION GRADE
Injection Molder	SGMM-12345	PASS

INSPECTION SUMMARY

Upon completion of the inspection of the injection molder, no problems or concerns were reported. All the machine's components and operating systems were evaluated, verifying their proper functioning. Additionally, a comprehensive assessment of the safety measures was conducted, confirming their compliance with standards and effective performance. To ensure the machine remains in top condition for future production runs, regular maintenance is recommended as a proactive measure. Overall, the inspection results indicated that the machine was operating optimally, meeting safety regulations, and prepared for immediate utilization.

Injection Unit	Good	✓
Mold Clamping Unit	Good	✓
Hydraulic System	Good	✓
Temperature Control System	Good	✓
Ejector System	Good	✓
Lubrication System	Good	✓
Safety Devices	Good	✓
Control Software	Good	✓
